**Site Address:**  
950 Penn Hall Road  
Union Hall, VA-24176

**Inspection Date:**  
September 19, 2021

**Report Prepared For:**  
Woltz & Associates

**Report Prepared By:**  
Pillar to Post  
4515 Belford St SW  
Roanoke, VA-24018  
Phone Number: 540-392-7678

**Inspector:**  
Home Check Up, LLC: #RT-110362

### Continuous Radon Monitor

Model Number: 1028  
Calibration Date: 07/21/2021  
Monitor Time: 9/20/2021 11:56

Serial Number: 95692008  
CF: 2.63

#### Inspection Company

Home Check Up, LLC  
Pillar to Post  
4515 Belford St SW  
Roanoke, VA-24018  
Phone Number: 540-392-7678  
License Number: RT-110362

#### Billing Information

Woltz & Associates  
950 Penn Hall Road  
Union Hall, VA-24176

#### Site Information

Woltz & Associates  
950 Penn Hall Road  
Union Hall, VA-24176

#### Site & Condition

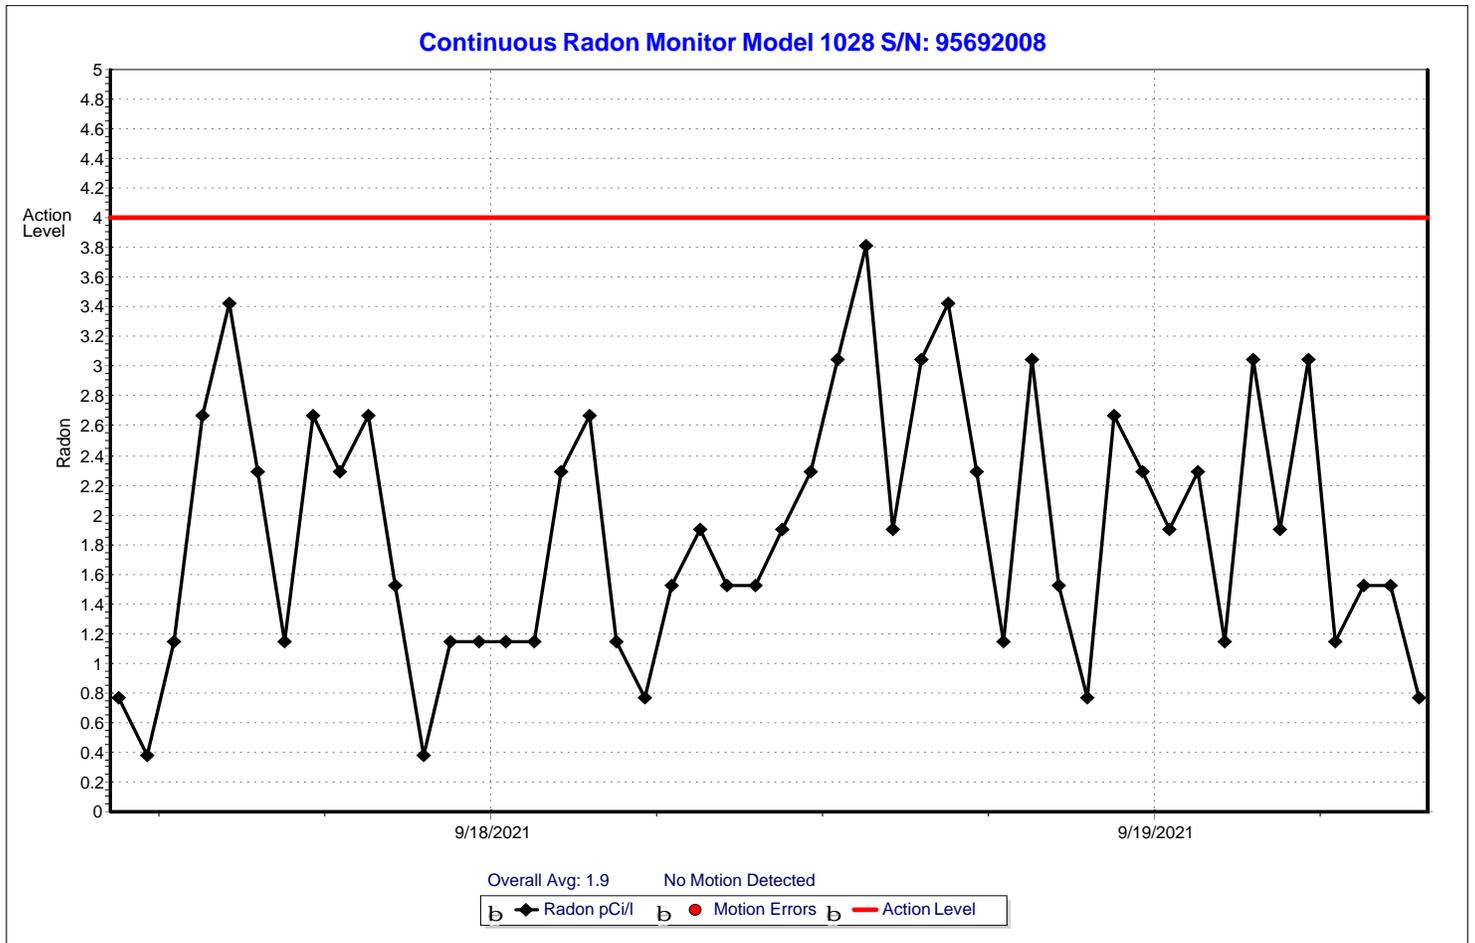

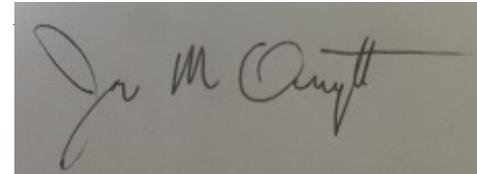

Mitigation System: Not Installed

Atmospheric Condition: Overcast  
Structure Type: 2 story house base  
Monitor Location: Basement billiard rm

#### Test Summary

Start Time: 09/17/2021 09:34  
End Time: 09/19/2021 09:34  
Measurement Interval(hr): 1.0  
Exposure Time: 2 Days 0 hrs

Overall Avg: 1.9 pCi/l  
EPA Avg: 1.9 pCi/l

## Radon Risk Information

---

Radon is the second leading cause of lung cancer, after smoking. The US EPA and Surgeon General strongly recommend taking further action when a homes radon test results are 4.0 pCi/l or greater. The concentration of radon in the home is measured in picocuries per liter of air (pCi/l). Radon levels less than 4.0 pCi/l still pose some risk and in many cases may be reduced. If the radon level in the home is between 2.0 and 4.0 pCi/l, the EPA still recommends that you consider fixing the home. The average indoor radon level is estimated to be about 1.3 pCi/l; roughly 0.4 pCi/l of radon is normally found in the outside air. The higher the home radon level, the greater the health risk. Even homes with very high radon levels can be reduced to below 4.0 pCi/l and many homes can be reduced to 2.0 pCi/l or less.

---

### Understanding Time-Sensitive Testing Protocols

---

*Continuous Monitor Results:*

Single test result average 4.0 pCi/l or more

Fix the home

Single test result average between 2.0 and 4.0 pCi/l

Consider fixing the home

Less than 4.0 pCi/l: confirm the low result by testing again at least every two years and whenever significant changes to the home structure or mechanical systems occur.

Test during different seasons and different weather conditions to reduce your risk of exposure.
